

2-DAY HANDS-ON WORKSHOP

Presented by:

DR. DAN HOLTZCLAW, DDS, MS & DR. JACK T. KRAUSER

PFAST: PTERYGOID FIXATED ARCH STABILIZING TECHNIQUE

October 16th-17th, 2020

Coppel Medical Training Facility | 820 W Sandy Lake Rd #400, Coppel, TX 75019

FRIDAY OCT. 16th | 8:00 AM-4:00 PM

Day One

8:00 am - 12:00 pm

Didactic Lecture

12:00 pm-13:00 pm

Break

1:00 pm-4:00 pm

Hands On Model

SATURDAY OCT. 17th | 8:00 AM-1:00 PM

Day Two

8:00 am - 9: 00 am

Anatomy overview

9:00 am - 12:00 pm

Cephalus Specimen Dissection

12:00 pm-13:00 pm

Lunch

Course Description

Although they have been in use for over 50 years, Pterygoid implants are one of the least understood styles of dental implant treatment. This may be due to the fact that pterygoid implants are widely considered to be one of the most difficult fixtures to place in all of implant dentistry.

This 2-day course hosted by Dr. Dan Holtzclaw, one of the world's most experienced clinicians in pterygoid implant treatment, will provide knowledge and guidance for incorporating this style of treatment into your full arch dental implant practice. After didactic learning about pterygoid implants, course participants will receive hands-on guidance for the placement of pterygoid implants on both models and cadavers. Course participants will also receive a complimentary copy of Dr. Holtzclaw's new 230 page textbook, Pterygoid Implants: The Art and Science.

Course Objectives

- ✔ Review history of pterygoid implant treatment
- ✔ Review anatomy pertinent to pterygoid implant treatment
- ✔ Review indications and contraindications for pterygoid implants
- ✔ Pre-Surgical workup for treatment planning pterygoid implants
- ✔ Review surgical techniques for the placement of pterygoid implants
- ✔ Review complications associated with pterygoid implants
- ✔ Review prosthetic restorations of pterygoid dental implants

Speaker

Dan Holtzclaw, DDS, MS

Dr. Dan Holtzclaw is a Diplomate of both the American Board of Periodontology and the International Congress of Oral Implantologists. Long recognized as one of the world's leaders in full-arch implantology, Dr. Holtzclaw has published over 60 articles in peer reviewed journals such as the Journal of American Dental Association, the Journal of Periodontology, Implant Dentistry, the International Journal of Periodontics and Restorative Dentistry, and Compendium. Dr. Holtzclaw has served as the Editor-In-Chief of the Journal of Implant and Advanced Clinical Dentistry for 13 years in addition to serving as an editorial board member and/or editorial reviewer for six additional dental journals.

With over 150 main podium lectures provided at major dental conferences all over the world, Dr. Holtzclaw has been named a "Leader in Continuing Dental Education" by Dentistry Today Magazine for the past 14 consecutive years. A past recipient of the prestigious "Excellence in Research Award" from the International College of Dentists, Dr. Holtzclaw has pioneered a number of innovative surgical procedures such as the Pterygoid Fixated Arch Stabilization Technique (PFAST) and the Piezoelectric Hinge Assisted Ridge Split (PHARS) protocol. Dr. Holtzclaw maintains a full-time private practice specializing in same-day full-arch implant dentistry utilizing zygomatic, pterygoid, and standard dental implants. Dr. Holtzclaw is a proud 13 year veteran of the United States Navy who finished his naval career as the periodontist for the US Navy Blue Angels Flight Demonstration Team.

Speaker

Dr. Jack T. Krauser

Jack T. Krauser, DMD, has been involved in implant surgical therapy since 1988. Not only was he the first practicing periodontist in Palm Beach County to be trained in osseointegration, the Swedish method that all modern case procedures are based upon, he also has significantly contributed to dental implant advances with his innovations in product design and treatment methodologies. For example, several of his designs are patented and utilized by major American and international implant companies. He has lectured on 6 continents. He has coauthored a definitive textbook on the subject, Dental Implants: The Art and Science, by Elsevier publishing. He has achieved the honor of Fellow in the Academy of Osseointegration. He is one of a very small group of clinicians who has been invited to share his thoughts and treatment outcomes with the Food and Drug Administration on

the effectiveness of dental implant care administered to the public. There are 4 textbook chapters as well as more than 24 peer-reviewed journal articles on the subject matter. As a leader of several global and national implant societies, he has enthusiastically encouraged his colleagues to join learn and share material for the overall growth of the field. Curiously, in this crowded field of talented local clinicians, the 2011 edition of his textbook's cover depicts a clinical example of the now popular "All-on-Four" clinical procedure and concept. Several cases for truly indigent and needy patients have received pro bono work and care. Finally, he has been featured on the cover of Dentistry Today as one of the top dental educators since 2001.
